

SYSTEM AND METHOD FOR MONITORING AND DIAGNOSIS OF
VIDEO NETWORK PERFORMANCE

ABSTRACT OF THE INVENTION

A system and method for diagnosis of video device
performance in the transfer of audio visual data over a
video network physically interfaces with the network to
5 receive audio visual data associated with the video
device of interest and uses diagnostic tools to access
the audio visual data for determination of performance
statistics with analysis of the accessed audio visual
data, including video device jitter, latency, throughput,
10 and packet loss.
